EDUCATION

Vishwakarma Institute Of Technology, Pune

Pune, India

B.Tech in Information Technology — CGPA: 8.85/10

Aug 2019 – May 2023

TECHNICAL SKILLS

Languages:	C#, C++, Python, TypeScript, JavaScript, SQL
Frameworks:	.NET 9, ASP.NET Core, Minimal APIs (.NET 8/9), EF Core, MediatR, React, SignalR
Architecture:	Microservices, CQRS, Clean Architecture, Vertical Slice Architecture, RESTful API Design, Event-Driven
Cloud & DevOps:	Docker, CI/CD (GitHub Actions), Nginx, Redis, RabbitMQ, OpenTelemetry
AI & Databases:	RAG Pipeline, Gemini AI, Qdrant Vector DB, PostgreSQL, SQL Server
Practices:	SOLID Principles, Unit Testing (xUnit), Agile/Scrum, Git, Serilog

EXPERIENCE

Software Engineer

Sept 2023 – Present

FIS Global — Full Stack Development

Pune, India

- Built and maintained backend modules for global banking applications using **ASP.NET Core** and **SQL Server** in high-availability production environments.
- Migrated 3 legacy modules from **.NET Framework** to **.NET 8**, improving build pipeline stability and enabling modern runtime features.
- Introduced **Minimal APIs (.NET 8)** for new internal service endpoints, reducing controller boilerplate across lightweight banking modules.
- Optimized high-volume **T-SQL** stored procedures with targeted indexing, improving data retrieval performance for transaction-heavy workloads.

PROJECTS

Foresight — AI Financial Forecasting Platform [\[Code\]](#)

.NET 9, Minimal APIs, React, Gemini AI, PostgreSQL, Docker, GitHub Actions, xUnit, JWT, EF Core, MediatR

- Architected full-stack platform with **Vertical Slice Architecture** and **MediatR**, running 1,000-iteration **Monte Carlo simulations** across P10/P50/P90 risk percentiles.
- Built backend with **Minimal APIs (.NET 9)** and integrated **Gemini AI** to generate plain-English risk summaries from simulation outputs.
- Containerized stack with **Docker Compose**; secured via **JWT** and **PostgreSQL** through **EF Core** migrations.
- Automated **CI/CD** with **GitHub Actions** running **xUnit** tests, React lint/build, Docker verification, and **Gitleaks** secret scanning; mirrored scanning in a local pre-commit hook.

FinQuery — AI-Powered Personal Finance Manager [\[Code\]](#)

.NET 8, React, Qdrant Vector DB, Redis, SignalR, Docker, GitHub Actions, Serilog, JWT

- Implemented a **RAG pipeline** with **Qdrant** vector search and embeddings, enabling natural-language queries over personal finance data.
- Built **Redis** caching for high-frequency reads and real-time budget alerts via **SignalR**, with async dispatch for event-driven notifications.
- Configured **GitHub Actions CI** for .NET build/test, React lint/build, Docker verification, and **Gitleaks** secret scanning with a matching pre-commit hook.

ACHIEVEMENTS

- **International Publication:** [Improved Helmet Detection Model Using YOLOv5](#) published in **Springer** after international peer review.
- **Programming:** Solved **300+** DSA problems on LeetCode and GeeksforGeeks; consistent performer in weekly contests.
- **Academic Excellence:** Secured top **1%** rank among **4.1 Lakh** students in MHT-CET 2019.
